

Please amend claim 1 to read as follows:

1 1. (Amended) An interactive computer controlled display
2 system with speech command input recognition comprising:
3 means for predetermining a plurality of speech commands
4 each associated with a corresponding plurality of system
5 actions,
6 means for concurrently detecting said predetermined
7 speech commands and non-predetermined speech queries for
8 locating commands,
9 means responsive to a predetermined detected speech
10 command for carrying out the system action corresponding to
11 the command, and
12 means responsive to a detected non-predetermined speech
13 query for attempting to locate predetermined commands
14 applicable to said query.

Please amend claim 6 to read as follows:

1 6. (Amended) A method for providing speech command input to
2 an interactive computer controlled display system with
3 speech command input recognition comprising:
4 predetermining a plurality of speech commands each
5 associated with a corresponding plurality of system actions,
6 concurrently detecting said predetermined speech
7 commands and non-predetermined speech queries for locating
8 commands,
9 responsive to a detected predetermined speech command,
10 carrying out the system action corresponding to the command,
11 and
12 responsive to a detected non-predetermined speech
13 query, attempting to locate predetermined commands
14 applicable to said query.

✓
Please amend claim 11 to read as follows:

1 11. (Amended) A computer program having program code
2 included on a computer readable medium for speech command
3 input recognition in an interactive computer controlled
4 display system comprising:
5 means for predetermining a plurality of speech commands
6 each associated with a corresponding plurality of system
7 actions,
8 means for concurrently detecting said predetermined
9 speech commands and non-predetermined speech queries for
10 locating commands,
11 means responsive to a detected predetermined speech
12 command for carrying out the system action corresponding to
13 the command, and
14 means responsive to a detected non-predetermined speech
15 query for attempting to locate predetermined commands
16 applicable to said query.

VERSION WITH MARKING TO SHOW CHANGES MADE

Please amend claim 1 to read as follows:

1 1. (Amended) An interactive computer controlled display
2 system with speech command input recognition comprising:
3 means for predetermining a plurality of speech commands
4 each associated with a corresponding plurality of system
5 actions,
6 means for concurrently detecting said predetermined
7 speech commands and non-predetermined speech queries for
8 locating commands,
9 means responsive to a predetermined detected speech
10 command for carrying out the system action corresponding to
11 the command, and
12 means responsive to a detected non-predetermined speech
13 query for attempting to locate predetermined commands
14 applicable to said query.

Please amend claim 6 to read as follows:

1 6. (Amended) A method for providing speech command input to
2 an interactive computer controlled display system with
3 speech command input recognition comprising:
4 predetermining a plurality of speech commands each
5 associated with a corresponding plurality of system actions,
6 concurrently detecting said predetermined speech
7 commands and non-predetermined speech queries for locating
8 commands,
9 responsive to a detected predetermined speech command,
10 carrying out the system action corresponding to the command,
11 and
12 responsive to a detected non-predetermined speech
13 query, attempting to locate predetermined commands
14 applicable to said query.

Please amend claim 11 to read as follows:

1 11. (Amended) A computer program having program code
2 included on a computer readable medium for speech command
3 input recognition in an interactive computer controlled
4 display system comprising:

5 means for predetermining a plurality of speech commands
6 each associated with a corresponding plurality of system
7 actions,

8 means for concurrently detecting said predetermined
9 speech commands and non-predetermined speech queries for
10 locating commands,

11 means responsive to a detected predetermined speech
12 command for carrying out the system action corresponding to
13 the command, and

14 means responsive to a detected non-predetermined speech
15 query for attempting to locate predetermined commands
16 applicable to said query.
